LYNX Whitepaper

August, 2023

Introduction

Overview

- Lynx Tech is a Web3 software development company committed to enhancing everyone's Web3 experience.

- Our first flagship product - DeadShot (Sniping and Trading Bot), provides traders with an unparalleled algorithm, exceptional efficiency, and top-tier security in crypto trading.

Problem Statement

- Crypto trading and sniping present challenges such as volatility, liquidity risks, fraud, scams, and security concerns, often complicating timely trade execution especially across multiple blockchains and assets.

Solution

- DeadShot addresses these challenges by offering a comprehensive suite of features designed to empower traders. From high-speed transactions to advanced analysis tools and anti-scam detection, this bot empowers traders to take control of their crypto investments while minimizing risks.

Our Target Markets

DeadShot - MVP *Sniping Bot Tax 1%*

- Supports Multi-Chain
  - Ethereum
  - Binance Smart Chain
  - Polygon network
- Other People's Wallet (OPW) Full Graphical Analysis
- Copies and multiplies gas for front-running.
- Snipes V2 and V3 Liquidity
- Snipes the exact amount of tokens defined.
- Snipes through encrypted smart contracts to prevent sandwich bots, copy bots, and front-runners.
- Anti-rug and Anti-blacklisting
- Supports EIP-1559 (ETH)
- Sophisticated filter against bad actors.
- Classic Sniping
- Executes Rapidly
- Mirror Sniping
- Slippage settings for buying and selling.
- Verifies tokens on EtherScan, BscScan, and PolygonScan.
- Snipes private transactions in the next block.
- Handles multiple wallets
- Absolute Stop Loss/Gain
- Trailing Stop Loss/Gain
- Manual selling in various percentages.

Road Map - DeadShot

- **First-Mover Advantage and Expansion**
  - Arbitrum
  - Base

CHAIN	ETH ✓	BSC ✓	MATIC ✓	BASE (Delivery: Q4)	ARB
Twitter Followers		3.1M	133K	448K	845K
Trading Volume	$111M	$75M	$1.4M	$120M	$3M

- **Features in the pipeline**
  - Limit Orders
  - Live New Pairs Notifications
  - Gem Finder
  - Token Analysis
  - Trend Analysis
  - Portfolio Management (Track P/L)

Why HODL $LYNX?

Token Utility

Our native token, $LYNX, powers the ecosystem. Users need to hold at least 1,000 $LYNX to unlock top-tier features and experience the full range of ecosystem benefits.

Multiple Reward Structure (MRS)

- Rewards will be generated from the following sources:
  a. 1% transaction tax for the Sniping bot.
  b. 5% $LYNX Buy and Sell Tax
  c. Staking reward pool of 500,000 $LYNX.
- **Tiered Rewards Program**: Qualify for tier rewards with a minimum 35-day holding period.
  - Tier 1: Holders with **≥ 50,000 $LYNX** share **60%** of DeadShot's tax revenue pool and **6%** of the monthly tax trading volume pool from $LYNX transactions.
  - Tier 2: Holders with **1,000 to 49,999.99 $LYNX** share **40%** of DeadShot's tax revenue pool and **4%** of the monthly tax trading volume pool.
- **HODLer Rewards**: No minimum holding period. Receive **30%** of the Gross Tax Revenue, redistributed to existing holders to **incentivize holding (24%)** and **liquidity provision (6%)**.
- **Staking:** Stake $LYNX for up to a **17.99% APR** to grow your crypto portfolio and generate passive income.

Sample MRS Benefits

Sample Trading Volume

CHAIN	ETH	BSC	MATIC	BASE	ARB
Twitter X Followers		3.1M	133K	448K	845K
Trading Volume	$111M	$75M	$1.4M	$120M	$3M
0.005% Total Bot Volume	$555K	$375K	$7000	$600K	$15K

Assuming 0.005% of the Trading Volume was purchased using DeadShot Bot

A user holding 1% of the Supply will receive:

- **VIP access** to top tier features
- Multiple Reward Structure

   Sample reward computation:

   TBV = Total Bot Volume **$1,552,000**

   LGTR = LYNX Gross Tax Revenue (5% Total Buy/Sell Token Volume)

   DGTR = DeadShot Gross Tax Revenue (1% of TBV)

   $15,520 DGTR * 60% /20 Holders = $465.6 Per Month (ETH)

   $600,000 LGTR * 6% / 20 Holders = $1,800 Per Month (ETH)

   50,000 $LYNX * 17.99% APR = 749.58 $LYNX Per Month (LYNX)

   $600,000 LGTR * 24% Reflection Reward = $1,440 Per Month (ETH)

Assumption: 20 Qualified Holders, $600, 000 Token revenue, Sniping Bot Vol $1,552,000
Anti-Whale = Max of 1.5% per Wallet

Security Measures

Regular Security Audits

- Regular security audits proactively verify and maintain the trustworthiness of our products, identifying and addressing vulnerabilities to enhance system integrity against potential threats.

Privacy by Design

- DeadShot Bot operates in a stateless manner, ensuring no retention of user keys, phrases, or sensitive data on its hard drive.

User Responsibility

- User responsibility is paramount. You must securely manage and protect your private keys, phrases, and sensitive information. DeadShot Bot cannot retrieve lost or compromised data.
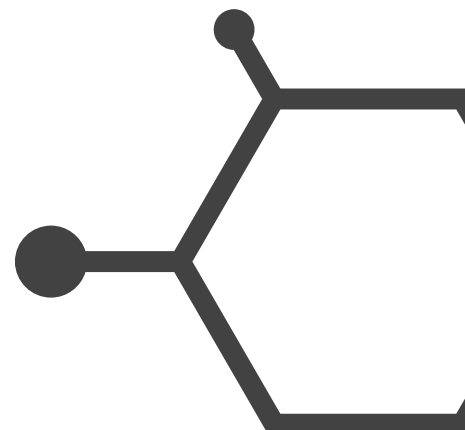

Continuous Improvement

Development Roadmap

- Our dedication to continuous improvement is evident in our well-defined development roadmap, outlining our future plans and enhancements. This roadmap serves as a transparent commitment to our users, ensuring that our products and services evolve in line with their needs and expectations.

Community Engagement

- We actively foster a sense of collaboration by engaging with our community, valuing their feedback and insights as essential in shaping our development direction. This inclusive approach not only strengthens our relationship with users but also enables us to build products that genuinely address their preferences and requirements.
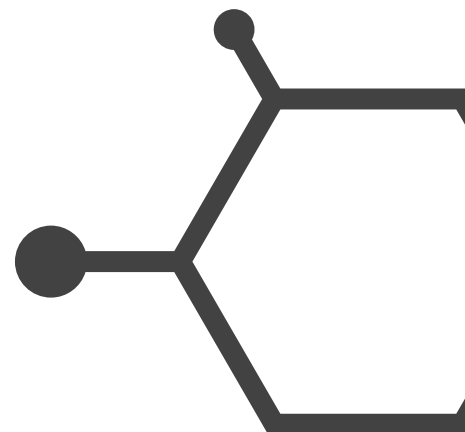

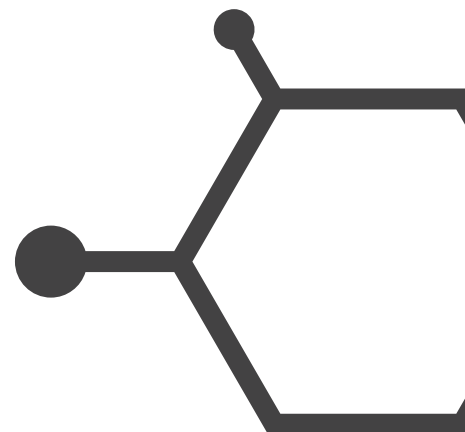

Lynx Tech, Inc. Roadmap

Quarter 3, 2023

- Project Launch
- DeadShot Bot Development
- Planning: BASE, Web2, and ARB expansion
- Extensive Smart Contract Audit
- Assure Defi Verification

Quarter 4, 2023:

- First Release: DeadShot
- Development: BASE, Web2, or ARB
- Community-Driven Upgrades
- Multiple-Reward-Structure
- Exploring Gamification
- Partnership and Marketing
- CEX Listing
